

Hotel Infinity Pools You Will Be Dreaming About Forever

Courtesy Playa Vik José Ignacio

Playa Vik José Ignacio, Uruguay

The design of this small modernist gem is breathtaking to begin with: a main hall that's all angles and curves of glass and titanium, six detail-filled casitas with hand-painted floors and flowering roof gardens, plus an impressive international art collection. And then there's [Playa Vik's](#) amazing cantilevered granite infinity pool, which seems to hang out into the heavens itself — an image that clearly occurred to the designers, because at night, the pool lights up with a star map of the southern hemisphere.
